

MSME Subsidy / Incentive Claim Pack

Document type: Licence / statutory filing · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Prepares an MSME subsidy or incentive claim — a capital-investment subsidy, an interest subsidy, a ZED-certification incentive, or a technology-upgradation subsidy — under a central or state scheme, computing the eligible amount and assembling the investment proof, the claim forms and the sanction/disbursement documentation.

Purpose of this tool & output

Prepare an MSME subsidy or incentive claim — capital, interest, ZED or technology upgradation — with the eligibility and computation

How the output is used

Use the scheme identification, the eligible-amount computation and the document set to file the subsidy or incentive claim with the department, and follow it through sanction to the DBT disbursement.

Who receives it

The sanctioning authority under the central or state MSME or industrial scheme (the DIC or industries department, or the scheme portal), which sanctions and disburses the incentive.

How to submit / file it

File the claim with the Udyam, the investment proof, the CA certificate, the machinery invoices and the bank sanction, within the scheme window, and complete any verification for the sanction and disbursement.

Fees & charges

No claim fee; a CA certificate carries a professional fee, and the incentive is disbursed after sanction.

Who should vet it

A chartered accountant — to compute the eligible incentive and certify the investment, and to assemble the claim for the specific scheme.

Important cautions

The incentive rate and cap depend on the scheme, the sector, the category and a backward-area enhancement, and the investment must be within the scheme operative window; a claim outside the window or without the CA certificate is rejected. Verify the current scheme terms with the department.

Companion documents
