Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

From a single profile of a household or small business, discovers the central and state schemes it is likely eligible for — welfare, pension, housing, health, education, credit and subsidy — and produces a prioritised, bundled application plan with the documents each needs, so nothing eligible is left unclaimed.

Purpose of this tool & output

Discover every government scheme a household or business is eligible for from one intake, and get a bundled application plan

How the output is used

Use the eligibility map and the prioritised, bundled application plan to gather the shared documents once, apply to the schemes in the right order, and confirm each on its portal so nothing eligible is left unclaimed.

Important cautions

The eligibility is indicative and must be confirmed on each scheme portal, since criteria, income limits and state variants change; the bundled plan is a starting map, not a guarantee of sanction. Verify each scheme officially.
