

Government e-Tender Bid Preparation

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Prepares a government e-procurement bid — the technical bid (eligibility, experience, compliance sheets), the financial bid, and the EMD/performance-security and document set — for a specific tender on GeM, CPPP or a state portal, so the bid is responsive and not rejected on technical grounds.

Purpose of this tool & output

Prepare a government e-tender bid — technical and financial bid, EMD and compliance/eligibility sheets — for GeM or CPPP/state portals

How the output is used

Use the eligibility mapping, the technical-bid compliance sheets and the financial-bid structure to assemble and upload a responsive bid on the tender portal, claim the MSE or startup relaxations where applicable, and submit the EMD or the exemption.

Important cautions

A bid is declared non-responsive for a missed eligibility document, an un-signed sheet or a wrong EMD, so every criterion in the actual tender document must be met exactly; the MSE or startup relaxations apply only with the registrations in place. Verify against the actual tender document.

Companion documents
