

Hazardous / Bio-Medical Waste Authorisation Application

Document type: Licence / statutory filing · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Prepares the SPCB authorisation application under the Hazardous and Other Wastes Rules or the Bio-Medical Waste Rules — for a generator, storer, transporter or facility — with the waste inventory and categories, the storage and disposal arrangement, the tie-up with an authorised disposal facility (a TSDF or a Common Bio-Medical Waste Treatment Facility), and the forms and documents. For a detailed waste-management plan, pair it with the Self-Service waste-plan tools.

Purpose of this tool & output

Prepare a State Pollution Control Board authorisation application for hazardous-waste or bio-medical-waste handling, with the inventory and disposal tie-up

How the output is used

Use the waste inventory, the categorisation and the disposal tie-up to file the SPCB authorisation application under the Hazardous and Other Wastes Rules or the Bio-Medical Waste Rules, and to keep the returns and manifests the authorisation requires.

Who receives it

The State Pollution Control Board (SPCB) / Pollution Control Committee that grants the authorisation; the authorised disposal facility (a TSDF or a Common Bio-Medical Waste Treatment Facility) that you tie up with.

How to submit / file it

Apply online on the SPCB/CPCB portal with the waste inventory and categories, the storage and disposal arrangement, the CTO/consent and the facility tie-up; the SPCB grants the authorisation after scrutiny/inspection.

Fees & charges

The application fee is set by the SPCB and varies by category and quantity; the disposal facility charges its own per-tonne/per-kg fee, and a consultant fee may apply.

Who should vet it

An environmental consultant — to categorise the waste correctly, confirm the storage and disposal arrangement, and prepare the SPCB application and returns.

Important cautions

Handling hazardous or bio-medical waste without a valid authorisation is an offence under the Environment (Protection) Act; the authorisation is tied to the categories, the quantity and a valid consent (CTO) and disposal tie-up. Verify the current SPCB requirement and rules before applying.

Companion documents

No related documents are listed on the portal for this tool.

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
