

HIPAA Security Risk Assessment

Healthcare

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Performs a HIPAA Security Rule risk assessment for an entity handling US PHI — administrative, physical and technical safeguard gaps with risk ratings, required controls and remediation priorities. Use this for US HIPAA; for India digital-health rules use the ABDM / ABHA Compliance Check.

Purpose of this tool & output

Assess US-health-data security risk

How the output is used

Use the assessment to rate US-health-data security risk and to prioritise safeguards before a HIPAA audit.

Who should vet it

A security/privacy officer, to validate the risk ratings and the safeguard plan.

Important cautions

AI-generated assessment; not legal/compliance certification; a HIPAA expert must validate.
