

Booking & Enquiry Management System

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a booking and enquiry-management system — capturing enquiries across channels (call/WhatsApp/website/app), qualifying and scheduling, confirmation and reminders, and not losing leads — so every enquiry is captured and converted. Use it to organise bookings. For assigning technicians use the Dispatch & Job Assignment System.

Purpose of this tool & output

Capture and convert every service enquiry

How the output is used

Use it to capture and convert every service enquiry — a booking and enquiry management system that loses fewer leads.

Important cautions

A missed call or un-followed-up enquiry is a lost job; capture every enquiry in one place and follow up fast — home-services demand is often urgent and goes to whoever answers first.
