

Gig / Partner Technician Model

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a gig/partner technician model — onboarding and verification of partners, commission/payout, quality and behaviour standards, incentives and deactivation rules — so you scale capacity flexibly without losing quality or trust. Use it to run a partner network. For the agreement use the Technician Employment / Partner Agreement.

Purpose of this tool & output

Scale with partner technicians, keep quality

How the output is used

Use it to scale with partner technicians while keeping quality — a gig/partner model with onboarding, quality and payout controls.

Important cautions

Gig/partner technicians must clear the same verification and quality bar as employees — customers do not distinguish, and one bad partner harms your brand. Guard against partners taking customers direct.
