

Job Tracking & Status Communication

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a job-tracking and status-communication system — updates at booking/assignment/on-the-way/arrival/completion, technician details and ETA, and post-job feedback — so customers are informed and reassured (like the aggregator experience). Use it to improve experience. For booking use the Booking & Enquiry Management System.

Purpose of this tool & output

Keep customers informed at every stage

How the output is used

Use it to keep customers informed at every stage — a job tracking and status-communication approach that builds trust.

Important cautions

Proactive status updates (assigned, on-the-way, arrived) reassure customers, cut chase calls, and match the aggregator experience customers now expect — even simple WhatsApp updates work.
