

Scheduling & Slot Management

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a scheduling and slot-management approach — realistic time slots and buffers, technician calendars, handling urgent vs scheduled jobs, and avoiding over-booking or idle gaps — so appointments are kept and time is used well. Use it to manage schedules. For dispatch use the Dispatch & Job Assignment System.

Purpose of this tool & output

Manage time slots and technician calendars

How the output is used

Use it to manage time slots and technician calendars — a scheduling and slot-management approach that avoids clashes and idle time.

Important cautions

Do not over-book to look full — a broken slot promise is a broken trust; build in travel and duration buffers and give honest arrival windows, updating the customer if running late.
