

Technician Training & Skilling

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a technician training and skilling program — technical/trade skills, service and customer behaviour, safety, upselling ethics, and hygiene/professionalism — so technicians deliver quality work with a great customer experience. Use it to build capability. For hiring use the Technician Hiring & Verification Kit.

Purpose of this tool & output

Build technical and service skills

How the output is used

Use it to build technical and service skills — a technician training and skilling plan across the trade and customer service.

Important cautions

Customer experience (courtesy, cleanliness, respect, especially toward women customers) matters as much as technical skill in home services; train and certify both before letting a technician go solo.
