

Trade-Specific Licences Guide

Home & Repair Services

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains the trade-specific licences home-services businesses need for regulated work — electrical-contractor and wireman/supervisor licences, pest-control operator licence under the Insecticides Act, and any refrigerant-handling norms — with the process and why they matter for legality and liability. Use it before offering regulated services. For general registrations use the Registrations & Licences Guide.

Purpose of this tool & output

Electrical, pest and other licensed trades

How the output is used

Use it for electrical, pest and other licensed trades — the trade-specific licences and who needs them before you offer the service.

Important cautions

Operating electrical contracting or pest control without the required licence is illegal and exposes you to serious liability if something goes wrong; obtain the state electrical-contractor licence and Insecticides-Act pest-control licence before offering these. Confirm your state process.
