

Fire Safety Compliance Guide

Interior Design & Architecture

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a guide to fire-safety requirements affecting a building or interior fit-out — exits and travel distance, materials, detection/suppression, and NOC/approval — so the space is fire-safe and compliant. Describe the project below.

Purpose of this tool & output

Design and fit-out to fire norms

How the output is used

Use it to design and fit-out to fire norms — a fire safety compliance guide covering exits, materials and detection.

Important cautions

AI-generated guide; fire norms are code- and occupancy-specific and life-critical - confirm with a fire consultant and the fire authority.

Companion documents
