

Rate Analysis

Interior Design & Architecture

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Build a rate analysis for an interior work item — material, labour, wastage and overhead/margin — to arrive at a defensible unit rate for estimating or negotiating with vendors. Describe the item below.

Purpose of this tool & output

Build up a rate from first principles

How the output is used

Use it to build up a rate from first principles — a rate analysis across material, labour, wastage and margin for a defensible rate.

Who should vet it

A quantity surveyor or estimator, to confirm the material, labour and wastage inputs in the rate build-up.

Important cautions

AI-generated rate analysis; use your actual material/labour rates and consumption.
