

Structural Coordination Guide

Interior Design & Architecture

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a guide to coordinating interior/architecture design with structure — what interior changes are safe vs need a structural engineer (removing/altering walls, loading terraces, core cuts), and how to coordinate — so the design is safe and code-compliant. Describe the situation below.

Purpose of this tool & output

Coordinate design with structure safely

How the output is used

Use it to coordinate design with structure safely — a structural coordination guide so design changes never compromise safety.

Important cautions

AI-generated guide; NEVER alter structural elements without a qualified structural engineer and society/authority approval - it is dangerous and often illegal.
