

Cloud Cost Optimization

IT & Tech Compliance

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Recommends cloud cost optimisations (FinOps) — right-sizing, commitments, idle cleanup, storage tiering, autoscaling, spot and architecture — with estimated savings and effort. Use this to cut your bill; for an overall architecture review use the Well-Architected Assessment.

Purpose of this tool & output

Cut your cloud bill (FinOps)

How the output is used

Use the FinOps review to cut your cloud bill by finding waste, right-sizing and commitment savings.

Who should vet it

A cloud/FinOps engineer, to confirm the savings are safe for the workload.

Important cautions

AI-generated recommendations; validate in your billing/usage console.

Companion documents

- Cloud Architecture Review
