

Cloud Architecture Review

IT & Tech Compliance

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Reviews your cloud architecture against the Well-Architected Framework pillars — a per-pillar assessment, critical risks, quick wins and a prioritised action list. Use this for a full review; for cost specifically use the Cloud Cost Optimization tool and for config hardening use the Security Hardening Checklist.

Purpose of this tool & output

Describe your cloud setup and get a well-architected framework review with recommendations

How the output is used

Use the well-architected review to see where your cloud setup is weak on security, cost, reliability and performance, and to fix it.

Who should vet it

A cloud/solutions architect, to validate the recommendations for your workload.

Important cautions

AI-generated architecture review. Engage a certified cloud architect for production system changes.

Companion documents

- Cloud Cost Optimization
- Well-Architected Assessment
- Migration Plan Builder
- Security Hardening Checklist

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
