

Data Privacy Impact Assessment

IT & Tech Compliance

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a Data Privacy Impact Assessment (DPIA/PIA) — necessity/proportionality, risk-by-risk analysis with mitigations, legal basis and an overall risk rating. Use this for a high-risk processing activity; for overall India readiness use the DPDPA Readiness Assessment, and for records use the RoPA Builder.

Purpose of this tool & output

Describe a data processing activity and we produce a DPIA / PIA report

How the output is used

Use the DPIA/PIA report to assess and reduce privacy risk in a data-processing activity before you launch it.

Who should vet it

A Data Protection Officer or privacy consultant, to confirm the risks and safeguards.

Important cautions

AI-generated DPIA. High-risk processing may require consultation with the data protection authority before proceeding.

Companion documents

- RoPA Builder
- DPDPA Readiness Assessment
- Consent Management Design
- Data-Subject-Request Workflow

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
