

Security Hardening Checklist

IT & Tech Compliance

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a cloud security hardening checklist aligned to CIS benchmarks — IAM, network, encryption, logging/monitoring, storage and compute — prioritised by impact. Use this to harden config; for a full architecture review use the Well-Architected Assessment.

Purpose of this tool & output

Harden your cloud configuration

How the output is used

Use the checklist to harden your cloud configuration against common misconfigurations and attacks.

Important cautions

AI-generated checklist; align with CIS benchmarks and test changes.

Companion documents
