

Password / Access Policy

IT & Tech Compliance

Document type: Policy · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a password and access-control policy — complexity/passphrases, MFA, SSO, least privilege, joiner-mover-leaver, and privileged access — aligned to NIST/ISO. Use this for the access policy; for the full set use the IT Policy Library Generator.

Purpose of this tool & output

Set access control and password standards

How the output is used

Adopt the access/password policy to set authentication and access-control standards across systems.

Who receives it

Approved by the CISO/IT head; applies to all users and system accounts.

Important cautions

AI-generated draft; align with NIST/ISO guidance and your tooling.
