

RTO / RPO Calculator

IT & Tech Compliance

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Helps set RTO and RPO per system by criticality, with the architecture and cost implications of each target. Use this to define targets; for the recovery steps use the Disaster Recovery Runbook and for impact analysis use the Business Impact Analysis.

Purpose of this tool & output

Set recovery-time and data-loss targets

How the output is used

Use the calculator to set recovery-time (RTO) and data-loss (RPO) targets that match the business impact and cost.

Who should vet it

A business-continuity owner, to confirm the targets against the business impact.

Important cautions

AI-generated targets; validate against business impact and budget.

Companion documents
