

HS Code & Tariff Classification

Logistics & Trade

Document type: Financial model / analysis · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Identifies the correct 8-digit HSN/HS code for your product, the applicable customs duty stack, and any import restrictions or mandatory certifications. Use this before you import or export so your Bill of Entry or Shipping Bill uses the right code. For the full rupee landed cost once you know the code, use the Landed Cost Calculator; to double-check a duty figure, use the Import Duty Calculator.

Purpose of this tool & output

Describe your product and we identify the correct HS code, duty rate and import restrictions

How the output is used

Use it to fix the correct 8-digit HS/HSN code, duty rate and any import restrictions before you file your Bill of Entry or Shipping Bill.

Who should vet it

A customs broker (CHA), to confirm the classification and duty for your exact product.

Important cautions

AI-generated classification guidance. Verify with a licensed customs broker before filing Bills of Entry.
