

# Landed Cost Calculator

Logistics & Trade

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Calculates the complete rupee landed cost of an import — CIF value, BCD, Social Welfare Surcharge, IGST, cess, clearing/port/inland charges — plus your net cost after IGST input-tax credit. Use it to price imports correctly or compare suppliers. For a lower duty under a trade agreement, check the FTA Preferential-Rate Finder; to set a selling price from this cost, use the Import Pricing / Margin Calculator.

## Purpose of this tool & output

Describe your import shipment and we calculate the full landed cost including all duties and levies

## How the output is used

Use it to see the full rupee landed cost of an import (all duties, cess and charges) so you price correctly.

## Who should vet it

A customs broker (CHA), to confirm duty rates and cess for your product.

## Important cautions

Estimates based on standard rates. Actual duties may differ. Consult a customs broker.
