

Supply Chain Risk Assessment

Logistics & Trade

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Maps your end-to-end supply chain risks — single-source, geopolitical, currency, quality, capacity and disaster exposure — with a resilience score and the top actions to fix. Use it for a full resilience review. For a single dimension, see the Supplier Concentration Risk Map, Geopolitical / Route Risk Assessor or Supply Business Continuity Plan.

Purpose of this tool & output

Describe your supply chain and we map concentration risks, geopolitical exposure and resilience gaps

How the output is used

Use the risk map and resilience score to prioritise fixes across single-source, geopolitical and capacity exposure.

Who should vet it

A supply-chain/procurement lead, to validate the risk map and mitigation priorities.

Important cautions

AI-generated risk assessment. Conduct a formal audit with your logistics and procurement teams.
