

Total Cost of Ownership Modeller

Logistics & Trade

Document type: Financial model / analysis · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Models the total cost of ownership of a purchase — acquisition, logistics & duty, installation, operating, maintenance and disposal over its life — and shows where the real cost sits. Use it to compare capital purchases on true cost, not sticker price.

Purpose of this tool & output

See true cost beyond unit price

How the output is used

Use the TCO model to compare capital purchases on true lifetime cost, not just the sticker price.

Who should vet it

A finance/CA, to confirm the lifetime cost assumptions.

Important cautions

AI-generated model; refine with actual quotes.
