

Bunkering & Fuel Management Guide

Maritime, Shipping & Ports

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a bunker management plan — procurement and pricing, quality and sampling, quantity and safety, and consumption optimisation — for a vessel or fleet. Use it to manage the biggest operating cost and its quality risk.

Purpose of this tool & output

Manage bunkers, quality and cost

How the output is used

Use it to manage bunkers, quality and cost — a bunkering and fuel-management approach that controls the biggest running cost.

Important cautions

Bunkers are the dominant cost and fuel quality and quantity disputes and sulphur-cap compliance carry real financial and legal risk. Sample and test fuel, follow MARPOL and safe bunkering procedures and confirm supplier and dispute terms.
