

# Shipyard Quality & HSE Guide

Maritime, Shipping & Ports

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Builds the quality and health-safety-environment (HSE) system for a shipyard — welding and NDT and coating quality, class and owner acceptance, and the high-hazard safety regime. Use it to run shipyard quality and safety.

## Purpose of this tool & output

Run shipyard quality and safety systems

## How the output is used

Use it to run shipyard quality and safety systems — a quality and HSE approach for a compliant, reliable yard.

## Important cautions

Shipyard work is high-hazard and quality-and-class-critical; weld and coating quality and hot-work and confined-space safety are decisive. Align with class and quality standards and enforce a rigorous permit-to-work and safety regime.
