This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Localises a title, synopsis and keywords into multiple target languages - adapted for appeal and searchability, not just literally translated. Use this to list one title across regional catalogues. For the full submission metadata package use Streaming Platform Metadata.

Purpose of this tool & output

Localise titles and descriptions

How the output is used
