

Incident & Accident Report

Manufacturing & Industrial

Document type: Letter / notice · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Document an incident and prevent recurrence — a report with description, injury or damage, immediate and root cause, corrective and preventive actions, and a note on statutory reporting. Fill in the details below.

Purpose of this tool & output

Document incidents and prevent recurrence

How the output is used

Use the format to report an incident factually with cause and corrective action, and to notify authorities where required.

Who receives it

Internal safety/management; for reportable accidents, the Inspector of Factories (DISH).

How to submit / file it

Record immediately internally; a statutory notifiable accident must be reported to the authority within the prescribed time and format.

Who should vet it

The safety officer, and a labour-law consultant for statutory notification.

Important cautions

AI-generated report; follow statutory accident reporting requirements.
