

# Rejection & Defect Analysis

Manufacturing & Industrial

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Attack your top defects with data — a Pareto of defects by quantity and share, the vital few to fix, root cause and actions per defect, and the cost of rejection. Paste your defect data below.

## Purpose of this tool & output

Attack your top defects with data

## How the output is used

Use the analysis to attack your top defects with data and to cut the rejection rate.

## Who should vet it

A quality engineer, to confirm the defect Pareto and root cause.

## Important cautions

AI-generated analysis; based on the data you provide.
