

Accident Investigation Report Builder

Mining, Metals & Minerals

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a structured accident/incident investigation report for a mine — sequence of events, root-cause analysis, contributing factors, and corrective and preventive actions — that satisfies internal review and DGMS expectations. Fill in the incident below.

Purpose of this tool & output

Investigate incidents to prevent recurrence

How the output is used

Use it to investigate incidents to prevent recurrence — an accident investigation report that finds root cause and corrective action.

Important cautions

AI-generated report; reportable incidents must be notified to DGMS per statute.

Companion documents
