Mining Lease Application Kit

Mining, Metals & Minerals

Document type: Licence / statutory filing · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a documentation and preparation kit for a mining lease application — the papers, plans and clearances typically required, the sequence, and common reasons applications get returned — so your submission is complete first time. Fill in your context below.

Purpose of this tool & output

Assemble a complete lease application

How the output is used

Use it to assemble a complete mining lease application — the documents and plan a major-mineral ML application needs to be accepted.

Who receives it

The ML is granted by the State Government (Department of Mines) under the MMDR Act and Mineral Concession Rules; major minerals are largely by auction.

How to submit / file it

File the application with the approved mining plan, land and financial documents through the prescribed (auction/composite) route; the lease deed is executed on grant.

Fees & charges

Application/auction premium, and on grant royalty and dead rent per the mineral, plus stamp duty and registration on the lease deed.

Who should vet it

A mining lawyer and an RQP, to assemble a compliant application and the mining plan before filing.

Important cautions

AI-generated kit; confirm against your state mining department checklist.
