AISEVAK.IN · FREE GUIDE

Mining Profit & Loss Builder

Mining, Metals & Minerals

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Build a structured profit and loss statement for a mining/quarrying business — revenue by product, production and processing costs, royalty and statutory dues, overheads and depreciation — with margins and cost ratios. Fill in your figures below.

Purpose of this tool & output

A clear P&L for your mining business

How the output is used

Use it to build a clear P&L for your mining business — revenue, cost per tonne, royalty and overhead to the real bottom line.

Who should vet it

Your CA or finance lead, to confirm the cost and volume assumptions against your actual books.

Important cautions

AI-generated P&L; validate figures with your accountant.
