

Recovery & Yield Improvement Plan

Mining, Metals & Minerals

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a recovery/yield improvement plan for a processing operation — losses diagnosis across the flowsheet, recovery levers, and a measure-and-improve approach with expected gains — to lift saleable output per tonne of feed. Fill in your context below.

Purpose of this tool & output

Recover more product from the same ore

How the output is used

Use it to recover more product from the same ore — a recovery and yield improvement plan that lifts output without more mining.

Important cautions

AI-generated plan; validate with testwork and metallurgical balance.
