

Pharma Export Costing

Pharma, Chemicals & Life Sciences

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a pharma export costing — a cost sheet (product cost, packaging and labeling, documentation, freight, insurance, margin) with prices by Incoterm (FOB, CIF) and RoDTEP/drawback incentive awareness. Use this to price exports profitably. Verify freight and incentives. For a domestic product cost sheet use the Product Costing Calculator.

Purpose of this tool & output

Price exports profitably

How the output is used

Use it to build an export price from your ex-works cost, freight, insurance and margin so you quote profitably.

Who should vet it

A CA or your export desk to confirm the exchange-rate, freight and duty-drawback assumptions before you quote.

Important cautions

AI-generated costing; verify freight and incentives.
