

Pharma KPI Dashboard

Pharma, Chemicals & Life Sciences

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Defines a practical KPI set and review cadence for a pharma business — for each KPI the formula, why it matters and a benchmark hint — covering batch yield, right-first-time, OOS rate, on-time delivery, field-force productivity, prescriptions, expiry/returns and working capital. Use this to build a dashboard. Set targets from your own history.

Purpose of this tool & output

Track the metrics that run the business

How the output is used

Use the dashboard to track the operational, quality and financial metrics that actually run a pharma business.

Who should vet it

Your management team to confirm the metrics and targets fit your business.

Important cautions

AI-generated framework; set targets from your history.

Companion documents
