

Equipment Maintenance & Insurance

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds an equipment maintenance and insurance plan — cleaning/servicing schedule, sensor/lens care, weather/travel protection, and insurance (equipment, and public liability) — so your income-critical gear stays reliable and a loss/damage does not cripple you. Use it to protect gear. For gear inventory use the Gear Inventory & Kit Management tool.

Purpose of this tool & output

Protect your expensive, income-critical gear

How the output is used

Use it to protect your expensive, income-critical gear — an equipment maintenance and insurance plan that avoids costly downtime.

Important cautions

In humid India, store gear in a dry cabinet to prevent fungus; maintain and pre-check gear (failure at a wedding is a disaster) and insure it against theft/damage — an uninsured equipment loss can cripple the business. Consider public-liability cover too.
