

Family & Group Shot Management

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a system to manage family and group shots at a wedding — a pre-agreed combination list, an efficient organised process, a designated coordinator, and speed — so every important family combination is captured without chaos or delay (a top source of missed shots and stress). Use it for group-shot coverage. For the timeline use the Wedding Timeline & Coverage Planning tool.

Purpose of this tool & output

Get every family combination, efficiently

How the output is used

Use it to get every family combination, efficiently — a family and group shot management plan that saves time and tempers.

Important cautions

Get a pre-agreed family-combination list and a family coordinator to gather people — disorganised group shots are the top source of missed-important-relative complaints and wasted time; sequence groups efficiently and confirm the list before releasing everyone.
