

Gear Inventory & Kit Management

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a gear inventory and kit-management system — an asset register of all equipment, kit-checklists per shoot type, check-out/check-in for team use, and loss/damage tracking — so gear is accounted for, nothing is forgotten on a shoot, and losses are caught. Use it to manage gear. For maintenance use the Equipment Maintenance & Insurance tool.

Purpose of this tool & output

Track and pack your gear without loss

How the output is used

Use it to track and pack your gear without loss — a gear inventory and kit management system for every shoot.

Important cautions

An asset register (with serials/values for insurance), per-shoot kit-checklists and a check-out/check-in for team gear prevent forgotten items on shoots and catch losses; accountability for gear taken by team members is essential as you scale.
