

Location Scouting & Permits

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a location-scouting and permits process — assessing locations for light/angles/logistics, securing permissions/permits (monuments, venues, public spaces), and backup locations — so shoots at chosen locations go smoothly and legally. Use it before pre-wedding/outdoor shoots. For shoot planning use the Shoot Planning & Shot List tool.

Purpose of this tool & output

Scout locations and secure permissions

How the output is used

Use it to scout locations and secure permissions — a location scouting and permits guide so the shoot runs without surprises.

Important cautions

Many monuments (ASI) and venues require paid permission for professional/commercial shoots — secure it in advance to avoid being stopped; scout for best-light timing and have a backup location. Check drone no-fly zones.
