

Equipment Rental Management

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a system to manage renting equipment in (for occasional needs) and optionally renting your idle gear out — vendor relationships, rental terms and deposits, condition checks, insurance, and the rent-out revenue option — so you access gear flexibly and monetise idle equipment. Use it to manage rentals. For equipment planning use the Equipment Planning & Investment tool.

Purpose of this tool & output

Rent gear in and out efficiently

How the output is used

Use it to rent gear in and out efficiently — an equipment rental management process across booking, deposit and condition.

Important cautions

Document gear condition on pickup/return (both when renting in and out) with photos to avoid damage disputes, and use deposits/insurance; renting out idle gear earns revenue but carries damage/loss risk — screen renters and insure. Book rentals ahead for peak season.
