

Team & Freelancer Hiring Kit

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a hiring kit for photography roles — second shooters, cinematographers, editors, coordinator — with skill/style assessment, portfolio review, a test shoot/edit, and reliability checks, so you build a team that matches your style and delivers. Use it to recruit. For the contract use the Freelancer / Second-Shooter Agreement.

Purpose of this tool & output

Hire shooters and editors who fit your style

How the output is used

Use it to hire shooters and editors who fit your style — a team and freelancer hiring kit across skill, style and reliability.

Important cautions

Test for style match (a test shoot/edit against your reference) and reliability — a second shooter or editor who cannot match your style or turns up unreliably at a wedding is a serious risk. Skill plus style-and-reliability fit both matter.
