

Wedding Timeline & Coverage Planning

Photography & Videography

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a wedding coverage timeline — events and their key moments, timing and light, crew coverage per event, and buffers — with the couple, so every function is covered well and the crew is where the moments are. Use it to plan a wedding. For the on-day SOP use the Wedding Day Coverage SOP.

Purpose of this tool & output

Plan coverage across the whole wedding

How the output is used

Use it to plan coverage across the whole wedding — a wedding timeline and coverage plan so no key moment is missed.

Important cautions

Indian weddings run behind schedule and have parallel functions — build buffers, coordinate the real timeline with the couple/planner, and position crew for the unmissable moments (rituals cannot be reshot).
