

Canopy & Density Management Plan

Plantation & Commercial Crops

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a canopy and density management plan — bush or tree architecture, light interception, density and gap management — to sustain yield and quality over the estate life. Use it to keep the canopy productive.

Purpose of this tool & output

Manage canopy, light and plant density

How the output is used

Use it to manage canopy, light and plant density — a canopy and density management plan for balanced growth and yield.

Important cautions

Canopy targets are crop-specific and interact with pruning, shade and nutrition over years; abrupt changes can cost yield. Adapt to your crop and follow local research recommendations.
