

Plantation Crop Selector

Plantation & Commercial Crops

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Compares plantation crops against your land, climate and capital — gestation, yield, price and labour — and recommends the best fit with reasons. Use it to decide what to plant before you commit years.

Purpose of this tool & output

Choose the right plantation crop

How the output is used

Use it to choose the right plantation crop — tea, coffee, rubber, spices, cashew and more against your land, climate and market.

Important cautions

Crop fit depends on exact altitude, rainfall, soil and microclimate and on long-run price cycles; a wrong perennial choice is expensive to reverse. Confirm suitability with soil testing and local plantation expertise before planting.
