Estate Diversification Plan

Plantation & Commercial Crops

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a diversification plan for a plantation — additional crops, value addition, agri-tourism, and allied income — to reduce single-crop and price risk. Use it to spread income beyond the main crop.

Purpose of this tool & output

Diversify estate income

How the output is used

Use it to diversify estate income — a diversification plan across intercrops, value addition, tourism and new products.

Important cautions

Diversify into options that leverage your land, climate, labour and location and validate demand and capability before investing; spreading too thin harms the core crop. Pilot each before scaling.
