

Input Supply / Dealer Agreement

Plantation & Commercial Crops

Document type: Contract / agreement · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts an agreement for supply of fertilisers, agro-chemicals and other inputs to the estate — quality, quantity, price, credit and delivery — with a supplier or dealer. Use it to secure input supply on clear terms.

Purpose of this tool & output

Contract fertiliser and input supply

How the output is used

Use the draft to contract fertiliser and input supply — quality, price, delivery, credit and liability — reviewed by a lawyer.

Who receives it

The agreement is between the estate (buyer) and the input supplier/dealer; each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; the quality-warranty, price and credit terms are the key content.

Who should vet it

A lawyer, to check the quality-warranty, price-revision and credit clauses before signing.

Important cautions

A draft template, not legal advice; spurious or wrong inputs can damage the crop and breach residue rules and genuineness warranties and liability terms matter. Buy only approved, labelled inputs and have a lawyer review before signing.
