

Processing / Mill Tie-Up Agreement

Plantation & Commercial Crops

Document type: Contract / agreement · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a tie-up between a grower and a processor, factory or mill (for example tea leaf to a bought-leaf factory, or FFB to an oil-palm mill) — supply, price, quality and payment. Use it to formalise a processing relationship.

Purpose of this tool & output

Contract processing with a factory or mill

How the output is used

Use the draft to contract processing with a factory or mill — throughput, charges, quality, loss and payment — reviewed by a lawyer.

Who receives it

The agreement is between the estate and the factory/mill; each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; the processing charge, recovery/loss and quality terms are the key content.

Who should vet it

A lawyer, to check the processing-charge, recovery/loss and quality clauses before signing.

Important cautions

A draft template, not legal advice; price formulas (some government-linked), quality deductions and payment cycles are sensitive and material is perishable. Have a lawyer review and confirm any regulated pricing before signing.

Companion documents

- Plantation Land Lease Agreement
- Produce Supply Agreement
- Estate Employment Contract
- Contract Labour Supply Agreement
- Estate Management Agreement
- Transport / Logistics Agreement

processes vary by state and change over time — confirm with your state authority.
