

Pesticide Residue Compliance Programme

Plantation & Commercial Crops

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a pesticide-residue and contaminant compliance programme — approved inputs, pre-harvest intervals, testing and records — to meet destination-market residue and aflatoxin limits. Use it to protect export access.

Purpose of this tool & output

Meet residue limits for export

How the output is used

Use it to meet residue limits for export — a pesticide residue compliance programme across approved inputs, intervals and testing.

Important cautions

Residue and aflatoxin limits are strict, market-specific and change and a single detection can reject a consignment and hurt the sector reputation. Confirm current limits with the board and accredited labs and control inputs in the field.
