

Print Capacity Plan

Printing & Packaging

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Build a production-capacity plan for your press or packaging line — machine-wise available hours, realistic throughput, utilisation and bottleneck identification across shifts — so you can commit delivery dates and plan investment. Enter your machines and shift pattern below.

Purpose of this tool & output

Model achievable output across machines and shifts

How the output is used

Use it to model achievable output across machines and shifts — a capacity plan that sets realistic promises and load.

Important cautions

AI-generated estimate; validate against actual machine logs.
