

AI Business-Plan Builder

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a structured, fundable-quality business plan for your idea from the details you provide — executive summary, market and competition, products and pricing, go-to-market, operations, team, an indicative 3-year financial model, the right Indian funding scheme (MUDRA / PMEGP / Stand-Up India / CGTMSE), risks, milestones, and the registrations you will need. Exportable as Word & PDF. The financials are an indicative model built from your inputs with the assumptions stated — for a bank-ready DPR, hand off to AiSevak's dedicated finance/DPR tools.

Purpose of this tool & output

A structured, fundable-quality business plan for your idea — market, GTM, operations, team, 3-year financials and the right funding scheme

How the output is used

Use the plan as your working document — refine every section with your own numbers, replace each [assumption] placeholder with a validated figure, use the funding section to approach the right scheme (MUDRA / PMEGP / Stand-Up / CGTMSE), and follow the milestones. For a bank-ready DPR hand the financials to AiSevak's dedicated DPR/finance tools; for the registrations use the Self-Service and Government tools it points to.

Important cautions

The financials are an INDICATIVE model built from your inputs, not audited projections — validate every assumption with real suppliers, prices and demand before you rely on them or show a lender. A plan is only as good as the honesty of its numbers.
